

FUEL HARMONICS PLC

The fuel saving and emissions reducing device

The Fitch reduces CO₂ emissions and fuel consumption

Today, every road haulier needs to save on fuel costs - and here's how!

The Fitch Fuel Catalyst is a fuel saving device that will make a **huge positive impact on your costs.**

The Fitch is a simple, inexpensive unit that is dropped in-tank or fitted in-line to your vehicle's engine - **effective for petrol, diesel and bio-fuel mixes.**

- Average 100 day investment return
- Installation in under an hour
- Guaranteed for 800,000km
- Fully recyclable

Recent tests on a DAF CF85 Tractor fitted with a Fitch at the **Millbrook Proving Ground** conclusively showed a **5.3% saving in fuel consumption** in an urban environment and an impressive 4% in a suburban environment! The results illustrated the highest fuel saving ever seen in such a test!

See the full report, click here for the [Fitch Millbrook Results](#).

See the latest feature in [Transport Engineer](#).

Join one of the largest retail hauliers in the UK and install the Fitch in your new vehicle quota for 2010 and in your existing fleet, the savings speak for themselves.

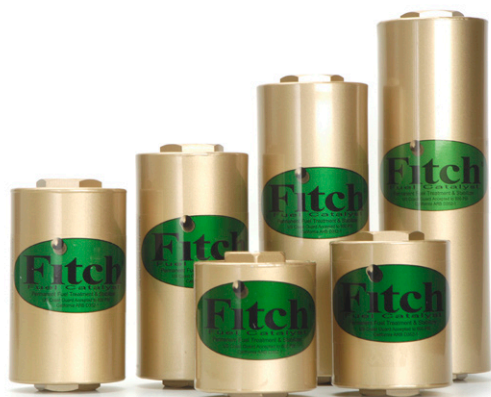

The Fitch also **dramatically reduces emissions** and is therefore perfectly positioned to help meet your vital CO₂ reduction targets. It also increases the Cetane rating of your fuel, which relates to better performance through an improved ignition quality, this in turn **improves performance and fuel economy, lengthens engine life** and lowers engine out emissions.
