

# The proven emissions and fuel saving device...

**...that offers you, your engines and your generators so much more!**

The Fitch is a drop-in and inline device that works to improve the carbon emissions and fuel economy of your diesel or petrol engines!

Known as the Fitch Fuel Catalyst System the unit is simply dropped in tank or attached, inline, to your engine.

Once deployed the Fitch gets to work in more ways than one! Marketed as "An emission improvement and fuel saving device" the benefits are far wider reaching and the improvements in engine performance and longevity are as remarkable as the savings on fuel consumption.

**Improve the environmental performance of your firm with the help of the Fitch Fuel Catalyst – it is proven to reduce pollutants such as CO<sub>2</sub>, NO<sub>2</sub>, carbon monoxide and nitric oxide by up to 15%.**
